USE OF INTERTEK CERTIFICATION MARKS

Congratulations on your successful Intertek certification and thank you for your interest in using an Intertek certification mark. The following guidelines provide you with information on the correct use of the certification mark that applies to your company.

Use of the mark

You can use this mark on your corporate correspondence as well as on information and PR materials.

The mark is available in a blue version and a black version. Please refrain from altering the colour or distorting the proportions. The mark may be used only in the combinations listed below. It is permitted to reduce the dimensions in exceptional cases, e.g. due to space restrictions or for cost reasons. However, the marks must remain fully legible at all times.

Misuse of marks

It is not permitted to display the mark on company buildings, flags, vehicles, packaging or products. The same applies for any form of publication that could be interpreted as an identification of product conformity. This also applies for objects that your company uses exclusively for advertising purposes (e.g. calendars). Furthermore, it is not permitted to use the logo on accompanying documentation like laboratory test reports, calibration certificates or inspection reports. There must be no implication that the certification applies to any activities that lie outside of the scope of the certification.

Correct use of the mark forms part of the contract terms. Flagrant and/or persistent misuse of the certification mark may be deemed as grounds for the certification to be suspended and/or revoked.

In the event of a suspension or revocation of the certification or if the contract is terminated, the distribution and publication of materials featuring the certification logo must cease immediately. In such cases, the certificate must be returned to Intertek Certification GmbH.

Changes to marks by Intertek

If changes are made to the mark, Intertek will send you information pertaining to the changes.

Questions and information

If you require any further information about the use of marks, you can contact us at: +49(0)2166 6007 0.
