

INLIGHT NETWORK

GLOBAL INSIGHT. LOCAL EXPERTISE.

Inlight Network offers a powerful combination of supplier engagement services, an innovative online platform, industry leading regulatory content and local expertise - all to help you, the vendor/supplier, get better visibility into your factories/sites compliance credentials.

Your Challenges

The business landscape is ever changing and becoming more complex for factories, vendors/suppliers and buyers - numerous innovations and products have allowed companies to transcend borders and become global entities, as well suppliers and their buyers are subject to more compliance requirements than ever before. While the opportunities are numerous, so are the challenges.

How can you the vendor/supplier assist your factories/sites further in making sure they add value and are compliant with regulations, while not missing an opportunity to grow your business and reduce growing, time-consuming paperwork?

This is where Inlight Network can help.

Our Solutions

Intertek's Audit Programs have grown significantly with over 200 clients accepting or using the Standards (<http://www.intertek.com/business-assurance/supplier-management/>), making them one of the common industry programs of choice.

Inlight Network is the next step in engaging factories/sites, vendor/suppliers and buyers via a trusted platform, providing access to audit history, results and key business and compliance information packaged under an Inlight Supplier Risk Profile.

The aggregate risk profile aims to provide an enhanced view towards customers managing

their supply chain compliance objectives, via their Inlight existing program or the network capabilities.

Inlight Network provides a trusted platform for:

- Vendors/suppliers to showcase their factories/sites profiles and gain easy access to their global customer network
- Enable customers to attain enhanced visibility of their supply chain network to support and manage their compliance program objectives
- Provide access to global data, trends, insights to support business intelligence efforts

Vendor/Supplier Benefits

- Inform clients of your factories full business profiles, audit history and compliance status to increase trust, reduce number of audits required in future, reduce audit costs and invest in improvement
- Get access to an Intertek database of factory compliance scorecards and build your own network
- Dashboard management and executive reporting output
- Build or expand your supply chain network with trusted data from Inlight network private portal
- Achieve trusted supplier status, increase business opportunities with your global brands/clients

- Help reduce audit costs and protect your reputation and brand

Inlight Network provides unprecedented access to help vendors/suppliers bring compliance and integrity to their operations and, in turn, give the buyer, immediate access to this information. Our vast network of local compliance experts, in more than 100 countries, offers the assurance needed to assist suppliers through training, guidance and continuous improvement.

Inlight Network was designed to provide vendor/supplier and buyer with efficiency, transparency and competitive advantage, while improving factory/site compliance and buyer collaboration for all parties involved.
